

Clark Forklift

Clark Forklift Forklift Training - At this time, there are over 350,000 Clark forklifts performing worldwide, and in excess of 250,000 operating in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive designs of forklifts, with components covering more than 120,000 specialized parts for all of its automated equipment. Your regional Clark Supplier is your complete source for availability of all your components requirements supplied by Clark Totalift.

Clark's exceptional Parts Distribution Stores are conveniently stationed in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to supply the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Clark Totalift has a very outstanding intercontinental support network. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the material handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional dedication to safety is currently a standard feature on every forklift.

Clark has a continual goal to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production plants. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental limitations, thus placing them in a dominant market position.

Supply Efficient Manufacturing

Clark has preferred the extremely economical and beneficial system of "Lean Manufacturing" for its assembly facilities and use of resources. This structure was established to acknowledge the most efficient approaches of manufacturing plant stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engine Design

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing expenses. The new value engineering agenda combines innovative product growth and offers improved customer support and service within the industry.
