

Mississauga Bucket Truck Training

Mississauga Bucket Truck Training - The bucket truck training program is a program which is intended to effectively train qualified operators so they could reduce the risk of incident and personal injury while working in close proximity to or with bucket trucks or vehicle-mounted aerial work platform. An aerial lift device is whatever vehicle-mounted device, telescoping or articulating, or both, which is utilized to position workers to reach locations which would otherwise be not accessible. Aerial lift devices are utilized to be able to elevate employees to above-ground work sites.

The goal of the program is to provide operators with the skills, knowledge, training materials and abilities needed to learn to operate vehicle-mounted aerial work platforms effectively and safely.

The program has two parts: a hands-on session and a classroom training session. In order to become certified, participants must be successful in both components. A wallet-size certificate and a full-size certificate would be issued upon finishing the program.

The types of lifts examined in the program include Aerial lift devices are normally constructed with metal, wood, reinforced plastic, fiberglass or other materials.

Definitions

Articulating boom platform: multiple hinged boom components.

Extensible boom platform: has an extensible or telescopic boom.

Platform: the part of an aerial device that is designed to carry employees.

Mobile unit: a combination of aerial devices, like for example its vehicle and related equipment.

Employers have the responsibility to make sure their employee obtain proper training before operating aerial devices. Employees must make certain they likewise receive the required training and that they do not operate lift devices if they are not authorized to do so. Employees must ensure that they have on the correct protective equipment when working from the platform.

The course content utilized in the bucket truck training program includes the operation of the vehicle-mounted aerial work platform, safe operating practices, pre-shift inspections, lifting capacity, use of emergency controls, and administering theory and practical tests. Operators would be familiar with legal requirements under the federal and local regulations.
